

Adam Elementary School and Cold Storage Update

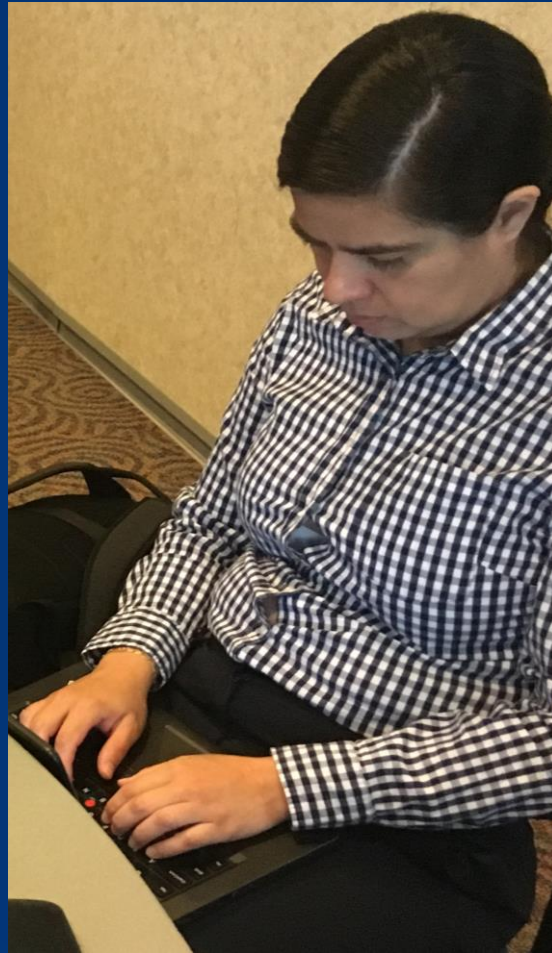

Elizabeth Montes continues to monitor the renovation that is underway and on schedule at Adam ES. One outstanding issue that is in MCA's queue is to replace the patch panels in the MDF and in the new IDF. The patch panels that were originally installed were not CFISD standard patch panels.

Elizabeth also meet with Unify Technicians to provide them with the IP addresses they need for the installed HVAC controllers.

Elizabeth worked with them and configured the necessary ports.

Elizabeth Montes

Elizabeth Montes continues to manage the work on the Cold Storage Facility. MCA relabeled the patch panel and the network plates. They also installed the new UPS units.

Elizabeth meet with Unify technicians to give them the IP addresses for the HVAC controllers. Elizabeth configured the ports for them. Unify was successfully able to communicated with the controllers

Lastly, **Elizabeth** provided Mike Raspet and Micah Hawkins the IP addresses and configured the Wattstopper.
