

Assets Team

USAC Audit: Mission Accomplished

This week the Assets team, in conjunction with the Network team, had the opportunity to participate in an official USAC audit for the Federal Communications Commission. After intense preparation the audit had come and gone and it was a success. The team for USAC commented that “This was one of the most organized and pleasant audits that they have done”. This is an excellent example of the level of collaboration that is exhibited everyday by Technology Services.

Pictured above are **Ray Leung** (Network team), **Geoff Brown** (Assets team), (Auditor), **Leonard Chance** (Assets team leader), **David Rodriguez** (Assets team), and **Cassandra Slade** (Assets team).

Assets Team Collaboration at its finest!!

Coordinating between two departments can present a variety of issues. From planning to execution, data entry to physical verification the Assets and Network team worked together seamlessly and the result was an audit that exceeded expectations.
