# Network Connectivity Upgraded During Berry Center Closure

Thomas Hollister

On October 7<sup>th</sup>, the ECN team learned that the Berry Center would be closed for maintenance on Monday, October 19, 2015. Mike Mallette, Assistant Technical Systems Manager at the Berry Center, notified Technology Services of the planned outage. Due to the fact that this facility is constantly booked with events, the ECN team decided to take advantage of the outage and upgrade the network connectivity. **Thomas Hollister**, pictured to the left, worked with Presidio and Gigabit Technologies to complete the Cisco network switch upgrade .

# Berry Center Switch Connectivity Upgraded

Nancy Grella

One of the unique features of the Berry Center is that it offers five facilities in one:

- Arena
- Stadium
- Theater
- Conference Center
- Satellite Food Production Center

With this unique design comes a non-standard technical configuration. The ECN team spent 12+ hours Monday, October 19<sup>th</sup> focused on the Berry Center switch upgrade:

**Thomas Hollister** – Onsite for the Cisco Switch installation.

**Roland Padilla** – Verified the voice over internet protocol (VOIP) phone system was back online and operational.

**Oscar Villar** – Verified the DHCP configurations were operating as designed.

Pictured to the left is **Nancy Grella** from the Device Imaging and Integration (DII) team. **Nancy** was onsite verifying the edge devices were functioning after the switch upgrade.
