

Watkins Middle School Construction Update

Michael Raspet and Tony Rogers were at Watkins Middle School July 26, 2017, to begin the installation of the network in the MDF closet. This was the first phase of the installation to bring the network back online at this campus. The installation will continue next week with the configuration of the remaining IDF closets, along with the wireless access points.

Watkins Middle School Construction Update

Rock Valentine, Chris Roberts and Arthur Ramirez assisting with the cleaning and installation of the network gear

Network switches were kept onsite at Watkins MS during the renovation. Unfortunately, this gear was covered with dust. The team above collected the switches, took them to the Service Center, vacuumed and cleaned each switch, then returned the gear to Watkins for installation.
