

Goal 2

CyFalls High School Network Infrastructure Upgrade is Complete!

The CyFalls high school network infrastructure upgrade is complete! It takes over 20 staff members to upgrade a high school campus. On average, there are more than 50 network switches that are installed in 16 network closets, and about 2500 cables that must be unpatched, then re-patched back into the network. It is an understatement to say this is a monumental job. It is a large job for one campus – but for 10 large high schools? It is a huge task!

Anna Senties, with Presidio and Gigabit Technology Staff

On Wednesday, [August 4, 2015](#), Frankie Jackson visited with staff at CyFalls high school. Anna Senties, CFISD's network analyst, is leading the network upgrade at CyFalls high school. Listen to the video with the youtube link shown on the left, to hear from Gigabit technologies about the wrap-up process.
