

Goal 2

# Anthony Middle School Switch Configuration Upgrade

On Tuesday February 23, 2016, **Thomas Hollister** worked with Presidio to upgrade the configuration of the Cisco 3850 switches in the campus network closets at Anthony MS. Anthony MS began serving students before the department began the bond related network upgrade at all campuses. The campus opened with the correct Cisco switch hardware, but an older configuration version. After the upgrade, the Cisco switch configuration is now the same version as the remainder of CFISD campuses.

**Bond Goal 2.3 Install Network Infrastructure Electronics – Campus Level**
