# Watkins Main Network Closet Relocated

Tony Rogers

The Facilities department is well underway with the renovation work scheduled for Watkins MS. **Tony Rogers** received a call from Facilities last Thursday morning stating that they were planning to demolish the MDF networking closet and that he needed to remove the networking equipment immediately. **Art Ramirez** and **Chris Roberts** from the Service Center offered to work with **Tony** to break down the closet. Pictured here is **Tony** with the Cisco 3850 switches, the Liebert UPS units, and the cabling from the MDF network closet. This equipment was removed from the existing MDF and will be installed in the new MDF.

Tony Rogers pictured with Gigabit Cabling Team

**Tony Rogers** is pictured to the left with a member of the Gigabit cabling team. The two are constructing the racks needed for the new MDF. **Tony** will dedicate the next couple of days to installing the new MDF closet and getting the campus administrative offices back online.

The picture above shows the portable village as it begins to materialize. Once all 40 portables are in place, **Tony** will then work with Facilities to provide connectivity to the portables.
