

Enterprise Infrastructure Communication Berry Center WIFI

On Friday May 19, 2017, **Elizabeth Montes** worked with **MCA** personnel to installed a second switch in the IDF E located in the catwalk at the Berry Center. The installed switch was requested by Layer3 to support the full dense WIFI deployment.

Enterprise Communication Network S Drive Slowness

David Steinke with EMC said best practice is to remove the ports connecting to the Isilon out of port channels and configure it as a trunk port. On 5/12/17 Andrew Tran and Kenneth Gibson reconfigured both the Brocade and Isilon at DC3 with no issue. On 5/16, When attempt at DC4, Kenneth lost IP connectivity to the Isilon. The configuration was rollback and Kenneth has to reboot node 1 of the Isilon to reestablish the connectivity between the Brocade and Isilon. On 5/18 Joel McCotter and Kenneth Gibson were able to made the changes. On 5/19 the changes on 5/18 did not resolve the slowness issue and we find out there also an imaging problem (totally separate issue). Michael Diaz working with David Steinke saw there are input errors coming into ports 1 of all 11 Isilon nodes. CFISD makes Joel McCotter aware of the finding. Joel saw there are CRC errors on one of the ISL port on the brocade. He shutdown that port and Oscar Villar reseated the QSFP and cable. Michael Diaz saw the errors are moving to port 2 of the Isilon. Andrew Tran also saw CRC errors incrementing on 2 of the 3 remaining ISL ports and suggested to Joel to reboot the Brocade switch in the evening. Joel rebooted and enable the shutdown port and CRC errors begin incrementing again. Layer3 are researching a potential documented software issue and will be in touch regarding the finding.

Enterprise Communication Network

Pictured above are the attendees for the "Emergency Live Streaming" meeting. Attendees included Frankie Jackson, Paula Ross, Theresa Hull, Beth Wade, Nicole Ray, Leslie Frances, Beth Wade, Sean Ramsey, Mitze Loere, and via Phone: Dave Dejohn (Paula Ross , Oscar Villar and Leslie Frances not pictured).

The team devised a plan for supporting the live streaming efforts of the CFISD 2017 high school graduations.
