

# Enterprise Communication Networks Operational Service

Worked with **Ray Leung** and **Richard Mitchell** in installing a Wireless Bridge to connect the Campbell Portable to the Campbell School. Due to renovation at Falcon Annex some of the repair team will be working from the Campbell Portable. Also we installed a cisco 3560 switch in portable an a Aruba wireless.

# Enterprise Communication Networks Operational Service

**Roland Padilla** visited Eldridge Transportation. Damage to underground cabling from past construction projects has incurred recent phone service issues. Efforts in place to address situation.

# Enterprise Communication Networks Operational Contribution

- Completed Cybersecurity Training
- Attended the Project Management/Tracking Sessions
- Provided **Joel McCotter** with an AD account
- Resolved INFOSERVER02 to 34.192.255.55 and 173.240.107.120 for **Richard Crishock**
- Troubleshoot Boardmaker Studio Communications for **Lillie Swearingen**
- Working with **Nancy Grella** to troubleshoot Google Docs issue
- Resolved Telecenter U connectivity issues at Matzke and Gleason for **Steven Roche**
- Provided Serial numbers and location of all 3700D Fortigate for **Wes Ballinger**
- Attended CFISD NSX ESG BGP/ECMP Remediation
- Attended Juniper event
- Attended BGP touchpoint meeting

# Enterprise Communication Networks Operational Contribution

On **Wednesday October 9, 2018** ECN quadrant Lead **Sani Saqr** went to Langham Creek High School and added an additional stack to IDF-B. Previously additional drops being added were already being added to the new rack itself, but there was no Network Switches currently in this rack therefor they were being routed to the first stack. To make the closet look cleaner and more organized, **Sani** added the new switch to the 2<sup>nd</sup> rack and will have the UPS mounted in there as well and then will re route the network cables accordingly in effect, giving it a much cleaner and more organized look.
