

Phish Alert Button Review

This week, **171** emails were reported through the Phish Alert button in Outlook. These messages were forwarded for review and removed from the customer's mailbox immediately. **James Costello** and **Eric Pina** continued to review these email messages and analyze the threat they posed to the district's network system. This week **75%** of the reports were found to be harmless emails. **97%** of the issues were closed within the week and **72%** were closed within 1 day. Our team is working to review these issues quickly and efficiently.
