

# Enterprise Communications Network Operational Highlights

Andrew Tran

Janette Martinez

The Facilities Department purchased an emergency notification system for the campuses and district facilities called TeleCenter U. TeleCenter U's partner, Firetron, is working with CFISD staff to deploy this system. **Andrew Tran** is supporting this project and attended a TeleCenter U meeting. **Andrew** developed a multi-cast IP addressing scheme for the emergency notification system. **Andrew** worked with Firetron to bring the system online at CFISD Instructional Support Center.

**Janette Martinez** continues to provide much needed coordination between ECN staff and vendor activities. **Janette** has been working on the following:

- Coordinate quadrant leaders and final walkthroughs in an attempt to close cabling effort with MCA and Presidio
- Coordinate Layer 3 activities such as removing Cisco APs, final walkthroughs, maintaining heat maps, and much, much more.

# Enterprise Communications Network Operational Highlights

**Roland Padilla** received a call from Maintenance supervisor Carey Ramsey that a delivery truck hit an overhead bundle of cables at Owens ES and cables are now hanging low. **Roland** asked MCA to assess situation. The findings were Phonoscope and Comcast cables were part of the bundle. Pictured right is CenterPoint pulling the low hanging cables until each company can address their cables. **Tony Rogers** is working with Phonoscope and Comcast to repair the low hanging cables.
