Enterprise Infrastructure Communication Operational Highlights

On Wednesday, March 22, 2017, Millennium installed a new electronic marquee at Salyards MS. **Elizabeth Montes** was contacted by Paul Roome from Facilities in order to attend a training session on how to operate the new marquee. **Elizabeth** met with Eric Pina (Service Technician at Salyards), Daniel Serwinek (DII), Marvin Banks (Maintenance), Carey Ramsey, and the School Admin team. The vendor taught the attendees how to operate the marquee. This marquee is locally connected.

Enterprise Infrastructure Communication Operational Highlights

Tuesday evening, March 21, 2017, the CFISD network experienced a major fiber break which affected 10 sites, including the Berry-HUB link being down. Fortunately, only one site, Lee Elementary, actually lost both redundant fiber connections. As a result, Lee ES was down almost 24 hours, until 2:30pm the following day, Wednesday. Several ECN team members worked to get these campuses back online. Pictured left is **Anna Senties** with staff members from Lee ES after network connectivity was restored.

Enterprise Communication Network Security "Panic Button"

Andrew Tran is currently working with both Facilities and an external vendor by the name of **Firetron.** This project is part of the 2014 bond addressing Facilities' safe and secure schools initiative. After Firetron completes the hardware installation at a campus, they contact **Andrew** to enable connectivity. Last week **Andrew** was able to complete the following campuses Hopper MS, Salyards MS, Kahla MS, Thornton MS and Dean MS.

Enterprise Infrastructure Communication Operational Highlights

Ray Leung received a ticket regarding a wireless access point (AP) in one of the testing labs at Dean MS. **Ray** and **Glen Carpenter** went to Dean to and discovered the port setup was not correct. The port had been configured for the HVAC Vlan. The configuration was corrected and AP is now back online..

Tony Rogers has been working with PSLightwave to get all of the secondary connections working at all campuses within his support zone. All campuses have both their primary and secondary connection online, with the exception of Lieder ES and Hancock ES.

A power pole was replaced at Fiest ES and the school lost power/network connections. **Tony Rogers** restored network connectivity for the campus.
