

Enterprise Communications Network Operational Highlights

Anna Senties and **Tony Rogers** met with Micah from Facilities to discuss a fiber relocation request for Dean MS. The Facilities' renovation work at Dean MS could potentially demolish the campus' primary connectivity. **Oscar Villar** and **Paula Ross** also conducted a conference call with Micah and Orion from Phonoscope Lightwave regarding the fiber relocation options available. The campus' primary fiber connection to ISC, plus several HUB connections are potentially affected. Technology is waiting on delivery of options from Phonoscope Lightwave.

The Grand Re-Opening of Pridgeon Stadium is tonight!
@CySpringsHS vs @CyWoods212 at 7 p.m. #176Afootball

Anna Senties and **Ray Leung** spent a significant amount of time this week preparing Pridgeon Stadium for the grand re-opening, inaugural football game. More details found under Bond 6.2 Renovations.

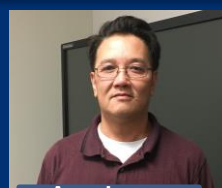

Enterprise Communications Network Operational Highlights

Oscar Villar

Andrew Tran

Janette Martinez coordinated/scheduled quadrant leaders to conduct final walk-throughs for campuses. Carl Simpson with Presidio walked the following campuses with the quadrant leaders this past week:

Anna Senties walked Jersey Village HS on 9/7/16

Elizabeth Montes walked Cy Fair HS on 9/6/16

Tony Rogers walked Cy Falls HS on 9/8/16

Ray Leung

Roland Padilla

Charles Newton

Thomas Hollister and **Oscar Villar** worked on issues with Texan Live streaming in support of the football games at the Berry Center. Initially, **Oscar** modified firewall rules in order to get the streaming to function. The streaming worked successfully for the first football game. Unfortunately, problems reoccurred during this past week's game. The problem resulted from Texan Live altering their outbound video destination location. Updates were made and the football game was streamed with success!

Enterprise Communications Network Operational Highlights

Elizabeth Montes, Juan Cruz from the CFISD Police Department, and David Deitsch from Presidio upgraded the switching infrastructure at the CFISD Police Department on Wednesday, September 7, 2016. For more details, see Bond 2.

Andrew Tran worked quietly in the background on the following tasks:

- Created separate Voice VLAN's for Carlton and Cy Fair Annex
- Configured switches for Carlton and Annex voice traffic
- Worked on TEA issue for Norma.
- Created and deployed DHCP scopes for the police department and Pridgeon
- Worked on Sunguard issue with Rodney

Oscar Villar worked another late night on **Thursday, September 8, 2016** with Melton Electronics. This is the third night the team has worked to implement cable management to the fiber in Data Center 3.
