

# Network Infrastructure Communication Supports Adam Elementary Renovation

Goal 6

On Friday, April 7, 2017, **Elizabeth Montes** met with Facilities project manager **Steven Johnson**, project coordinator **Courtney Abney**, **Marvin Banks**, **Shawn Grimm** from Maintenance, **Bill Peverill** the general contractor, and the Fire Marshall to conduct a fire inspection. This inspection is mandatory for any construction or renovation before the school personnel can start using the new classroom space that was built during the first phase of the renovation. **Elizabeth's** presence was required since the school would have a temporary power shutdown and **Elizabeth** had to make sure the network was not affected.

# Network Infrastructure Communication Supports Adam Elementary Renovation

After the Fire Marshall inspection was completed and the new classroom section was released. MCA was then able to start working on getting the phone lines ready for the AP's and Instructional Specialist offices. **Richard Martinez** and **Benito Orihuela (MCA)** worked hard on getting the new phone lines ready and relocating the time clock.
