

Goal 2

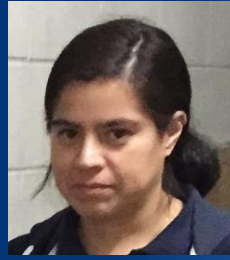

ECN Team Crosses Campus Conversion Finish Line

The ECN Team, along with Presidio and Gigabit Technologies, began upgrading the campus switching infrastructure in June 2015. The quadrant leaders, **Thomas Hollister**, **Anna Senties**, and **Elizabeth Montes**, spent the summer of 2015 focusing on our largest customers, the high school campuses.

As the 2015-16 school year began, the ECN Team had completed the high school campuses and shifted their focus to the middle school campuses. In the fall of 2015, we welcomed a new quadrant leader to the ECN Team, **Tony Rogers**. The quadrant leaders worked weekends to convert the middle school campuses.

As the 2015 year came to a close, the ECN Team had become extremely efficient at converting the MDF/IDF closets at a campus. The team decided to pilot the concept of converting an elementary campus during normal production hours instead of after hours or on weekends. The pilot was a success! In January 2016, **Thomas**, **Anna**, **Elizabeth**, and **Tony** each took a campus per week and began converting the elementary campuses.

Goal 2

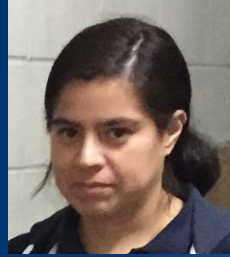

ECN Team Crosses Campus Conversion Finish Line

From January 2016 – April 15th, 2016, at least four elementary campuses were converted each week. Each quadrant leader converted approximately one campus per week. This past week was our last week for elementary campus conversions.

The week of April 11-15, 2016 the following final campuses were converted:

- April 11, 2016 Holbrook ES
- April 12, 2016 Lowery ES
- April 12, 2016 Gleason ES
- April 15, 2016 Fiest ES
