

Goal 2

Fortinet Completes On-Site Status

Fortinet Systems Engineer, David Whittington working with **Andrew Tran** to collect the following information:

- Current version and configuration of each of the 11 Fortigate firewalls that are on the network
- Basic diag of each box to show how much traffic is passing through and what policies are in place
- Review cabling and connectivity of each box so we can speak to options moving forward
- Review DMZ at ISC and gather specific details around active hosts via ARP, NAT and IP Addressing, current policy on the DMZ interface(s)

Andrew Tran working with Fortinet to complete an on-site discovery status of all Fortinet firewalls.
