

Communication Brings Clarity to Confusion at Francone ES

The following activities were initiated at Francone ES on Monday, June 20, 2016:

- **Ray Leung** cutting the campus to new Aruba wireless network.
- Layer 3 Communications verifying access points were installed and on-line.
- **Glen Carpenter** and MCA Communications verifying cross connects complete.
- Separate MCA crew sub-contracted through the Facilities department for cabling work.
- Facilities department working on campus renovation.

With several different initiatives taking place simultaneously, there was a significant amount of confusion. **Anna Senties** from the ECN team, met Steven Johnson, Facilities project manager, on-site and brought clarity to the confusion.
