Service-Oriented

Core Values

Richard Hoffman represents Technology Service's Core Values **Accessible** and **Service Oriented**.

While supporting Bond Project 4, Data Center Upgrades, Richard has proved to be both accessible and service oriented. Most recently, Richard came to work in Data Center 3 on November 25, 2015. This was the first day of his Thanksgiving holiday. Richard did this so the contractors could complete their tasks in the data center. This was to ensure that services were fully operational over the break.

Thank you Richard for being accessible and maintaining high service oriented standards.

Accessible Service-Oriented
