“Our mission is to maximize every student’s potential through rigorous and relevant learning experiences by preparing students to be 21st century global learners. To achieve it, we are proactively building a high-capacity network that will support the increased demands of wireless technologies, mobile devices, and high-speed connectivity. The Phonoscope LIGHTWAVE and Ciena solution provides the scalability and security we need to support these innovative programs that facilitate new types of classroom instruction, while also managing our mission-critical data and enabling future growth.”

Frankie Jackson, Chief Technology Officer, Cypress-Fairbanks ISD
