

Technology Infrastructure and Connectivity Being Installed at the New Matzke Elementary

Frankie Jackson visited the Enterprise Communications Network (ECN) team, Anna Senties, Tony Rogers, and Bob Rader at the new Matzke elementary school on **June 27, 2017**. The team is working with contractors, MCA Communications and Gigabit Technologies, to connect the network electronics and fiber/cabling into the network distribution closets so connectivity within the school can be established. Great job team!
