

Technology Infrastructure and Connectivity is Ready for School at Adam Elementary

Bond 6.2

Frankie Jackson visited staff at Adam elementary school on **August 25, 2017**. It was timely because “Meet the Teacher” for parents and students was going on. Adam staff were warmly welcoming hundreds of families and it was heartwarming to see. Technology infrastructure and connectivity was up and running. Our staff is to be commended for their hard work and dedication to this campus. In talking to the principal, she was extremely grateful.

New phones were working!

Network connectivity was fast!

Wireless BYOT was working!

The principal raved about the support she receives from Jose Vargas. She said, he takes care of all of their campus technology needs. She said she hoped he would always be available to support her school.

Thank you Jose!

Jose Vargas,
Adam Elementary Technician
