

Staff Working at **Jowell Elementary** Getting Ready for School Startup

Frankie Jackson visited Jowell elementary school on Friday, **August 12th, 2016**. She met with the principal to discuss expediting the installation of teacher computers, as teachers are returning on Monday, **August 15, 2016**.

The technology was left in a big mess of tangled wires and plastic. Many device components were unorganized and lost during the shuffle of the move. This made the task of getting the campus set back up very mundane and difficult.

Shown to the right is Geoff Brown, Asset Technician, and Chris Preston, Service Technician, working diligently to assemble teacher computers.
