

Online and Guided Study Course in Protecting Privacy in Connected Learning Offered by CoSN

On Thursday, **March 23, 2017** at 6:00 p.m., Frankie Jackson, Jennifer Miller, and John Crumbley took an online, guided study course on Protecting Privacy in Connected Learning. This week was on Determining Your Schools System's Needs. The course is offered by the Consortium of School Networking (CoSN). This course will serve as a baseline for building a CFISD Trusted Learning Environment.

- **Module 1** – Introduction
- **Module 2** – Addressing Primary Privacy Concerns
- **Module 3** – Compliance With Federal Privacy Laws
- **Module 4** – Determining Your School System's Needs
- **Module 5** – Evaluating and Contracting with Online Service Providers
- **Module 6** – Providing Notification and Obtaining Parental Consent
- **Module 7** – Step Through the Decision Making Process
- **Module 8** – Communicating Privacy Practices
- **Module 9** – Steps Every School District Should Take

PROTECTING PRIVACY IN CONNECTED LEARNING, SYLLABUS

Educators, students, and parents are now benefiting from the exciting opportunities available as a result of new instructional technologies, including cloud-based technology services and mobile applications. These technologies enable rich, data-powered classroom experiences and the anytime, anywhere learning that education technologists and educators have envisioned for many years. With new possibilities, however, come challenges. As schools turn to cloud services for applications, content and data analytics, and online assessment, keeping student data private and secure becomes more difficult. This 9-module course is designed for school district leaders who need help in understanding existing privacy laws, defining best and necessary practices around privacy, and communicating effectively with their communities.
