

Dean Elementary School

Getting Technology Ready for Start of School

Frankie Jackson visited Dean middle school on **August 17, 2017**. The school has had major renovations over the summer. New classrooms, flooring, and offices have been built and refurbished. As result, a lot of the technology had to be installed and or reinstalled. Campus Technician, **Paul Garrett**, has done a great job at working with Technology Services staff and contractors to get the school back together in time for school.

Thank you Paul!
