

SunGard Family Mobile App for Administrative Users is Approved by School Administration

On **October 21, 2015**, John Crumbley demonstrated the SunGard Family Mobile App for administrative users to school administration, including Scott Sheppard, Donna Guthrie, Travis Fanning, and Carla Brosnahan. John also invited Jeff Burnthorn, the Director of Instruction (DI), and Candace McCown, Associate Principal from Cy Fair high school. Jeff and Candace have been using the App as part of a pilot group, and are thrilled with the new capabilities that it provides. At the end of the presentation and demonstration, John received approval to move forward with the roll-out and implementation of the App. He received direction to present at the upcoming DI meetings for secondary campuses, and cluster meetings for elementary campuses.

The term "**lead from your feet, not from your seat**" has been coined as a result of the app now being available. A copy of John's presentation is available [here](#). Thank you John for making student information systems available to administrators. Now, administrative staff have a mobile tool with all student information readily available!
