

Thomas Hollister Supports the Communications Department in the Board Room Technology Upgrade and Connectivity for Live Video Streaming

On Friday, **February 5, 2016**, later in the evening, Frankie Jackson received a text message from Nicole Ray, Assistant Superintendent of Communications. She said, *“Thomas is working late in the board room with our team to try to get the live streaming working. Really appreciate the extra effort. He is a great guy. Please pass on the praise. It’s hard to find good people and when you do you need to let them know.”* I said, ‘Amen to that!’

Thomas Hollister

Because of Thomas Hollister’s support, the live streaming of the Board meetings was successfully transitioned from the old, archaic Mediacast system to the need Board room technology using the Tricaster 8000 and Google Live Streaming! Thomas’ accessibility and willingness to balance competing priorities using sound judgment for responding to customer requests is greatly appreciated!

Thank you Thomas for representing our organization core value of being accessible after hours! Your good nature and customer friendly attitude is heartwarming to our customers!

New Tricaster 8000 for the board room is live video system
