

# Homesley Elementary School Technology Ready for Start of School

Frankie Jackson visited Homesley elementary school on **August 16, 2017**. The school's ceiling and floors were replaced as part of a summer renovation project. As result, all of the technology had to be removed then reinstalled. Network analysts **Tony Rogers** and **Anna Senties** were at Homesley checking network connectivity. **Julia Gibson** and **Chris Preston** were setting teacher desktops back up, reimaging desktops, and upgrading to Windows 10. The team is doing an outstanding job and their efforts are greatly appreciated. **Thank you Team!**
