

# Elizabeth Montes Service-Oriented

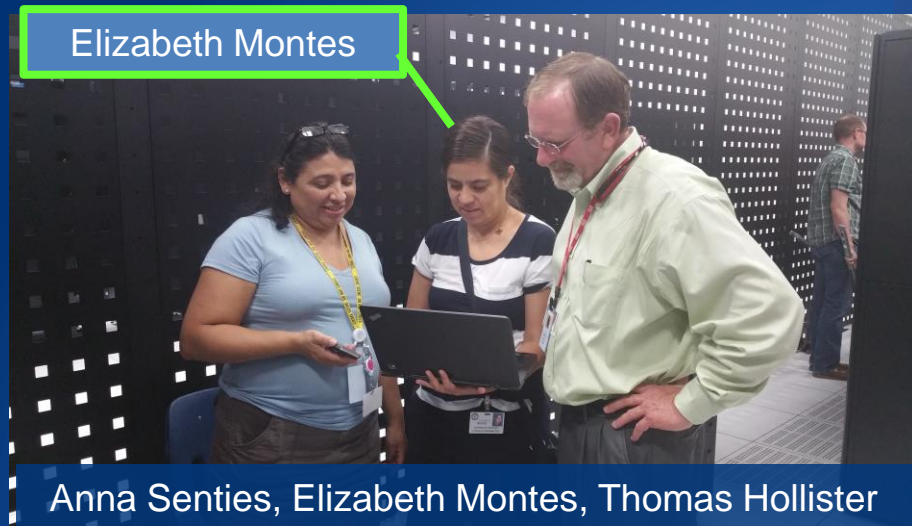

David Tooker, the Maintenance and Department HVAC Supervisor and his team provided a catered, Italian lunch on Thursday, **October 15, 2015**, for the entire Network Infrastructure and Communications (NIC) and Device Imaging and Integration (DII) team. David said thank you for all the support over the summer. Our service groups don't always get the appreciation they deserve, but we are vital to the success of this district. HVAC would like to offer a thank you as a small gesture of appreciation for all the effort and assistance we provided through the summer!

**Elizabeth Montes** is recognized because she was the primary network support staff member that worked with David's group this summer, upgrading hundreds of network connections as the HVAC systems were upgraded. David and his team commented about how helpful she was throughout the summer and they couldn't have completed their job without her. Thank you Elizabeth for representing what service-oriented is in our department!
