

Thank You to Staff

*feeling gratitude
and not
expressing it is
like wrapping a
present and
not giving it.*

Frankie Jackson thanks **Katie Hernandez** for helping her to prepare for the department meeting on Friday! Katie always goes above and beyond, but her help this week was greatly appreciated! From planning a great “macho-nacho” bar, to creating organizational value cards, to setting up and even bringing thanksgiving decorations from home..... To making a collage of pictures for the presentation ---- gratitude overflows! Thank you for all that you do!

Frankie Jackson thanks **John Crumbley** for taking the lead in working with HR to initiate the video conferencing project!

Frankie Jackson thanks **Jennifer Miller** for leading three separate technician meetings: service center, middle school, and high school. All three meetings were carefully planned and so well coordinated! Additionally, Frankie thanks **Jennifer** for running the logistics of the department meeting team activity – from buying markers, poster board, to leading the commentary and team activity. Her instructional teaching skills are always GREATLY appreciated. She has a real gift and guidance helps me every day!

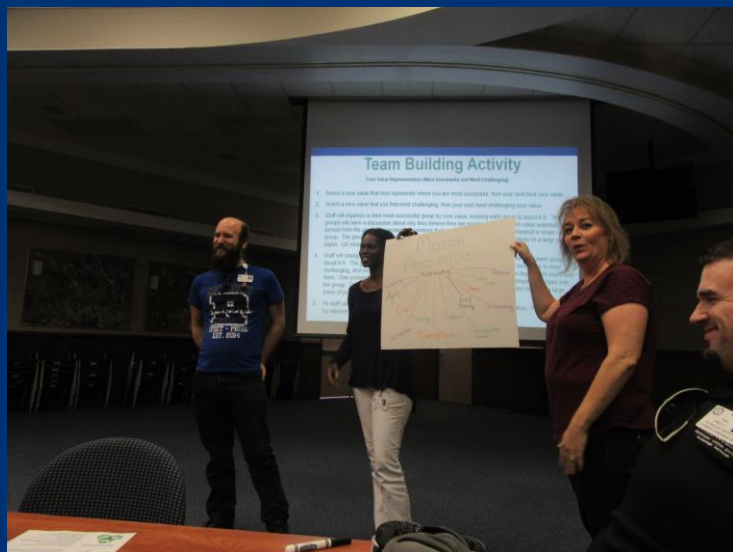

Thank You to Staff

Frankie Jackson thanks **Austen Chang** for presenting at the technician meetings. He carefully explained the new networking desktop monitoring software and provided instructions about how to install the software. Thank you!

Frankie Jackson thanks **Leonard Chance** for representing the district at a Hayes Technology Asset meeting to help develop processes for tracking technology items at the level needed for an e-rate audit. His leadership is appreciated!

Frankie also thanks the entire **Technology Services** department for being such great supporters of our team activity! It was so encouraging to see everyone participate and be enthusiastic. Thank you - Frankie

Leadership and Vision

Thank You to Staff

Frankie Jackson doesn't know where to begin in thanking the staff that worked on the middle school network upgrades and the wireless dense deployment upgrade last week. **Paula Ross, Larry Barrios, Oscar Villar, Derly Buentello, Anna Senties, and Elizabeth Montes**, among many others worked not only a full day, but they do whatever it takes – working late into the evening and on the weekends – to support the upgrades.

It is more than that however. It is the planning, the stress in making sure all is taken care of, the communication with the campuses and vendors, and doing it all with a GREAT attitude. Your positive attitude has an unbelievable influence on the way the entire staff is viewing our transformation. Your efforts continues to help things run smoothly and I appreciate your support more than you know!

- Frankie Jackson
