

Anna Senties, Derly Buentello, Larry Barrios and Paula Ross Stay Focused on Bringing Up High-Speed Wireless Access with Dense Deployment

Staff from the Enterprise Communications Network (ECN) and Device Imaging and Integration (DII) teams continue to stay focused on creating innovative plans to bring up the high school high-speed wireless access with dense deployment.

Shown in the following picture, **Anna Senties, Derly Buentello, Larry Barrios, and Paula Ross** are working with Presidio, Layer3, and Aruba: ***all in an effort to help students gain greater wireless access by connecting the additional wireless access points that were installed over the summer.*** This will provide faster wireless connection and increase the wireless coverage throughout the school, e.g. eliminate “dead spots.” Schools are anxious for full coverage and increased access!
