

Enterprise Communication Networks Langham Creek Renovations

On **Friday July 6th** ECN quadrant Lead **Sani Saqr** went to Langham Creek High school to shut down and unplug all of the network equipment in the entire school. On **Monday July 9th** there is a planned shutdown to all of the power school wide for over a week in accordance with their summer renovations. This is done so there is no worries when the power goes out and comes back on and there is no risk of any surges to the equipment,

Michael Raspet visited Langham Creek High School on **Thursday** to check the status of the portable building construction project. This fall, one-fourth of the school's classrooms will be relocated to the portable buildings while the permanent school facilities are remodeled. Technology will provide connectivity in the portable structures using a self contained mobile cabinet containing a UPS, 12 -1GB copper ethernet ports and an Aruba wireless access point.
