

Wells Elementary School Site Survey for Cabling

Michael Raspet met with members of the ECN team at Wells Elementary school on **Wednesday, February 15, 2017**, to finalize wiring locations of wireless access points (APs). **Anna Senties, Elizabeth Montes, Ray Leung, Thomas Hollister, Glen Carpenter and Charles Newton** all met with Charles from Layer3 and Shannon Thompson the CFISD project manager. Decisions on access point locations in the large open area of the library were being reviewed because of the height of the open ceiling and the use of large suspended geometric panels. Adjacent walls in the library were considered as alternative placement locations which prompted Shannon to call in ES#55 school architects Laura and Ann who were onsite to offer suggestions based on wall coverings and heights of the adjacent areas.
