

# Trend Micro Products

Greg Rhodes, Mike Raspet, and Lance Melancon met with Trend Micro's Suzy Moore (left), Regional Account Manager, and Charles Williams, Sr. Sales Engineer, to discuss Trend Micro's portfolio and how it may protect the district. Trend Micro is our AV/Malware protection solution for virtualized servers. Two additional products that will warrant further research is ServerProtect for the Isilon storage and Cloud App Security for O365. A second meeting is being planned for late February or early March.

# Unify/RCWebview

As requested per our Energy Systems department, **Lance Melancon** led the effort to complete a successful migration of the Unify server to the DMZ network. This deployment allows the Unify server to be readily accessible from outside of the CFISD network. RCWebview is used to schedule HVAC and lights at the campuses and for Energy Management troubleshooting.

The effort required multiple parties working together with **Lance** migrating the server, **Andrew Tran** of ECN configuring the required firewall and DNS entries, and **Leah Spurlock**, CFISD Energy Systems Coordinator, and the Unify support team testing and validating.

# Working Together

Coming together is a  
**BEGINNING**  
Keeping together is  
**PROGRESS**  
Working together is  
**SUCCESS**  
Henry Ford

**Kimberly Osborn** worked jointly with the Sub Office, Payroll & HR to create a process in which “Location” codes can be changed prior to the “Job” code.

In the past, HR would not change a location code, because the existing job code needed to be paid out by payroll before a change could be made. This was causing a great deal of agony for the staff that was transferring locations or jobs due to the location code being the basis in which data shares are assigned. After some discussion, everyone came to an understanding of the process, and it was determined that changing a location code would not affect payroll. We now have a process in place to email HR and request a location code change prior to the payroll run, giving transferred employees quicker access to their new job related data.

# State Routing for Transportation

**Nelda Hanzi** worked with the Transportation and the Transfinder Support to archive 2015-2016 school year databases and to create the state routing databases for school year 2016-2017.

State routing is the basis for district funding from the state.  
Database archival is critical should historical data be needed.
