

SQL Support

Nelda Hanzi and **Lance Melancon** addressed a WebCtrl SQL security issue. The customer was provided with the access that they needed, and **Nelda** took the time to explain the security features of SQL.

Paula Ross, **Nelda Hanzi**, **Greg Rhodes**, IAS members **John Crumbly**, **Eric May**, and **Rodney White**, and **Michelle Campos** of DII participated in a conference call with our Microsoft vendor, PCMG. The topic of discussion was to determine if it was more cost-effective to incorporate SQL Server licensing in our Microsoft EES agreement or to continue purchasing under our present contract. No decision has been made of yet; more investigation and discussion are needed.

Telecenter U

The Telecenter U product is a push button security device that can alert schools of an emergency at the “push of a button”.

Mike Diaz worked with **Adam Phillips** of FireTron to upgrade the Telecenter U software to the latest version 4.1 . As the rollout to the campuses is in progress, an issue with multicasting has occurred.

Mike built and configured a physical server as a possible part of the overall solution to the multicast issue.
