

VMware Certified Professional 6

Ken Gibson passed the VMware Data Center Virtualization Exam and is now a VMware Certified Professional 6. **Ken** has worked long and hard to complete his certification and becomes the third member of the VCP 6 group which includes **Lance Melancon** and **Mike Diaz**. Please congratulate **Ken** on his well earned success.

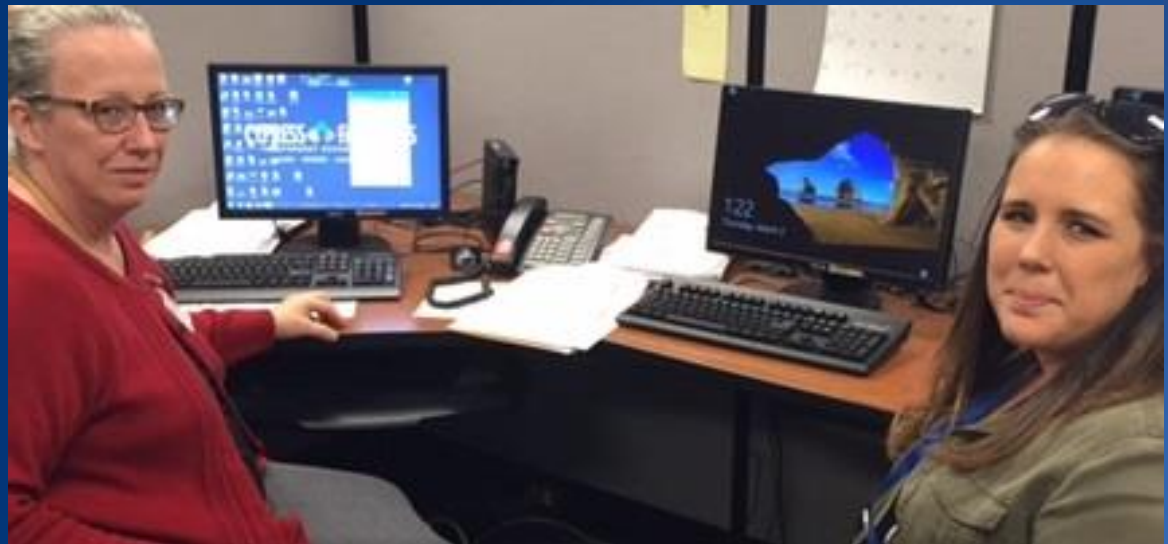

Online Technical Training Opportunities

For two years prior, NMO has purchased and used online training from StormWind. They are an online training provider that offers live classes and self-study options for Microsoft, CompTIA, VMware, Cisco, and others. The courses are tailored to vendor certification.

This year NMO, IAS, DII and the CCC purchased training with StormWind. **Nelda Hanzi** has served as the NMO coordinator. **Michelle Campos** is the designated coordinator for DII. **This week Nelda** worked with **Michelle** to explain how StormWind works and how to navigate the course offering.

Several staff members have expressed excitement about having the training available and are eager to dive in!!

LANDesk Optimization

Mike Diaz and **Josh Zhang** of DII worked together to optimize the virtual LANDesk DB server on the new VMware environment.

The optimization process consisted of using VMware SQL best practices and LANDesk best practices for VMware.

This has resulted in a better performance for CPU and memory usage. Various other configuration and testing is still ongoing using the new VMware VROPS tool.
