

NSX Training

While most teams were off **Spring Break**, **Mike Diaz** and **Andrew Tran** of DII spent their 5 days in the live class of VMware NSX: Install, Configure, Manage plus Troubleshooting and Operations Fast Track (V6.2). The boot camp like training started at 8:00 AM and did not finish till 6:00 PM or later. With this class, **Mike** and **Andrew** have those foundational NSX concepts to provide a secure and manageable network boundary for the virtualization deployment.
