Below: An HP vendor, Connie, tags each of the printers with HP's customer service sticker.

During the week of Thanksgiving, Service Technicians swapped out the old printers at Francone Elementary for new HP network printers. These new printers were then each added to the print servers so that faculty can use them upon returning from the Thanksgiving break.

During this pilot, HP is going to manage the devices in an effort to reduce the cost of printing on our campuses. If all goes well, the cost to print a single page should be significantly less while being managed by HP.
