

Organizational Announcement

Frankie Jackson

Frankie Jackson, Chief Technology Officer, announced Tuesday morning that as of December 31st she will begin a career transition into consulting and working at the National and International level of the CTO field.

On August 5, 2013, Frankie began her career with CFISD and made an impact from day one. Technology Services as an organization has grown and changed to accommodate the expanding student and staff population and Frankie has been at the core of those adjustments. She has guided us through a \$90 million bond, 5 years of E-Rate filings and reimbursements of over \$12 million, bringing about a massive network upgrade with wireless capabilities that are changing the way our students and staff get through their days. What a Herculean task!

We thank you!
