Business Services
T5 Staff Meeting

Our T5 staff meeting on October 29, 2018:
First day back after we discussed the full cycle of software development. Son Nguyen shares his knowledge of Software Development Methodologies. The most common is (SDLC) Software System Development Life Cycle. In simple terms it's the project design. The team will design and outline their projects before any development is done.

Graduation day!!

Business Services

Neetha Chada's contributions enhanced the districts Business Services.

- SRC issue about a teacher not being able to place an order

- Counselor activities: Mary Lui to generate different reports on the employee wellness reports.

- Resignation issue we had when we were in training.

- Isupport ticket, issue on para time sheets.

- Working with Angela Rhymes about tracking students and counselors appointments. They want to maintain a history of appointments,.

Angela Rhymes   Neetha Chada

CY-FAIR ISD

Contributions for this week include:

. eFinancePLUS

- Purchase Orders Printing (with Optio) - First, Internal Auditors have error printing POs. It takes multiple process of eliminations to nail it: The culprit: Auditors use a 'generic' account (afinance), and the account was NOT identified as 'Special' eFinancePLUS security user group for accessing to the eFinancePLUS' internal systems folders. Then, multiple users keep sending large POs Print jobs that jam the PO Optio printer (a PO print request of one PO roughly 16KB, a 33.8MB of a POs print job will jam Optio printer). Most of the time, users who sent large PO print jobs do NOT remember whats/hows … It takes multiple process of eliminations to nail it: The culprit: users run 'wild' searches for POs to be re-printed. Then just click Print Purchase Order to re-print the POs in the result list without realizing many thousands POs to be printed. Talk to PowerSchool about providing safeguade codes the PO Printing processes, PS said it requires custom codes ... Will need to 'train' users

- Fix the PEIMS 090 Records Update & Load 4GL programs crash. Re-write into .NET C-Sharp ADO.NET

- **CFISD Operation Support System (OSS) - Music School (MOSS) -** .NET OOT with C-sharp, N-tier Application Architecture, Telerik UIs for building Winform, Webform, Mobile Enterprise Apps.

- Continue the construction for the Invoice Statement module. R&D Break-throughs the Telerik Reporting Architecture, implement the N-tier Report Architecture for the Invoice Statement module, and for all CyFair Operation Supports Reporting needs

Birthday with most favorite Finance Bosses

Visual Studio 2012版

Progress Telerik UI for Xamarin
DOCUMENTATION AND API REFERENCE

Progress Telerik UI for ASP.NET MVC
DOCUMENTATION AND API REFERENCE

Progress Telerik UI for WinForms
DOCUMENTATION AND API REFERENCE

Geoff Brown and Dava Clark worked together to provide a solution to Lee Honeycutt to better support his users that request generic textbooks.

The solution includes a public form that will be linked in Infoserv for the users, and an administration page for Lee to mark the request 'Accepted' or 'Denied'.

Reflection

This week went by very fast and the weeks to come will get faster as we end the year.

This week many of our team members where out sick but the one's that remained picked up the slack and filled in where needed.

That is the sign of a healthy team even when they are sick.
