

# Disaster Recovery Readiness

## EMERGENCY POWER TEST

CFISD is in the midst of the **2018 Hurricane Season**, which began on June 1, 2018 and continues through November 30, 2018.

As CFISD experienced in August 2017 with Hurricane Harvey, it can be a devastating experience.

In preparation for a disaster, CFISD is coordinating a simulated power outage that will cut power from Datacenter 3, utilizing emergency power services such as UPSs and Generator power sources. Careful planning and execution will result in a better response to an emergency power situation.
