

Tammie Bartkowiak Security Access Rights

Access to resources is a main security concern.

Tammie Bartkowiak works tirelessly to ensure that users have access to the resources in eSchoolPLUS and eFinancePLUS required to successfully perform their assigned job duties.

Even more critical is ensuring that only authorized personnel have access to secure resources. This is an area that Tammie excels and shines at. She works with customers to provide access, while auditing the access lists to monitor for changes in employee status.

Tammie has worked with a team of programmers to create a technical process that identifies changes in status and provides her with the information needed to maintain security.

When speaking of Tammie, Frankie Jackson, CTO, states Tammie is “the smartest and most hardworking lady in town!”
